RSVP

Propane Autogas Rebates Through VAPGA

Autogas vehicle rebates are available for \$2,500 per vehicle, pending approval of application and completion of an initial survey and final survey. Virginia propane customers who purchase a new propane vehicle or convert an existing vehicle with a propane system are eligible for this rebate. Propane companies and their employees are also eligible to receive rebates.

VCC Talks: Communicating Environmental Change

In this episode, Ella Sher sits down with David Robinson of Birch Studio, a creative leader in environmental communication. David shares stories from his journey in sustainability and his ongoing work to make a difference in the environmental space.

Watch Now

CNG RNG Workshop

VCC, the Southwest Virginia Higher Education Center, Virginia Tech's Southwest Center, CNX, Diversified Energy, Enervest and EMats invite you to attend a special workshop highlighting Compressed Natural Gas (CNG) and Renewable Natural Gas (RNG) as a fueling option for fleets. The event is designed for fleet operators and managers and for local government representatives interested in learning about how this domestic fuel can lead to cost savings and economic growth.

SAVE THE DATE CNG-RNG Workshop

Learn about the benefits of natural gas and renewable natural gas as a transportation fuel.

Propane Vehicle Technician Training

ROUSH CleanTech works with its customers to close that gap to help ease the adoption of propane vehicles nationwide. The company provides multiple training options for customers and service center partners to increase adoption rates and help their propane fleets run smoothly. Learn more about their program this guest article.

InCharge Work Truck Open House

On July 24th, we partnered with Atlantic Heavy Duty and InCharge Energy to host an exciting electric work truck open house in North Chesterfield, VA. Attendees got an up-close look at the McNeilus Volterra™ electric refuse truck and other EVs, as well as learned about InCharge Energy's Any-Brand EV Charger Service.

HELP US IMPROVE!
Take our quick survey to share your perspective.

Expanding access to electric vehicle (EV) charging for transit agencies, fleets and the public.

Project SYNC is designed to create, evaluate, and test a business model for installing enroute EV chargers for transit agencies such as Bay Transit and Jaurt, while also making them available to the public.

PROJECT OBJECTIVES

1. Expand **clean mobility** options for residents in areas served by Bay Aging housing and Jaurt ridership
2. Enhance residents' **access to essential services** such as healthcare, childcare, employment, and other services
3. Ensure **reliable and affordable access to EV charging** for both transit agency fleets and the public

**1,800+**

Participate in our Project SYNC Survey

Project Share Your eNroute Charge (Project SYNC) is creating a community-driven model for EV charging deployment supporting access, resilience and integrated operations. The project is reducing emissions and promoting access to economic advantages.

Want to get involved? Fill out our quick survey and share it with others! This will give us valuable feedback on sentiments towards electric vehicles, electrified transit, and charging infrastructure in your area
